The *Notgalerie Seestadt - DREAM ESTATE* project is an attempt to create a sculpture park in the Seestadt urban development district, an area northeast of Vienna where a satellite city has been under construction for about ten years. Located opposite the subway station that connects the Seestadt with the city center, *DREAM ESTATE* was created in 2021 as a result of the art project *Notgalerie*. It features an installation consisting of a multi-part platform covering an area of 15,000 square meters. In total, there are eight individual platforms on the site, as well as the main installation which formed the foundation of Notgalerie.

The eight platforms

- The foundation is made of a concrete block, measuring about 1 cubic meter.
- The construction consists of an inverted wooden roof frame that carries the black painted platforms.
- Each platform is about 2 by 3 meters in size.
- It can be used for installations as well as for concerts, performances and interventions.

The container

- It serves as storage for materials and tools.
- The container can also be used as a bar.
- It is surrounded by a construction that functions as a main stage for concerts, performances and interventions.
- Both the container and the main stage have electricity and water supply.

The Main Stage

- This part was the the former foundation of *Notgalerie*.
- It is about 8 by 20 Meters in size.
- On top there are 5 sub-platforms painted black.
- They can be used for installations as well as for concerts, performances and interventions.

The Area

- Notgalerie Seestadt – DREAM ESTATE covers an area of 15,000 square meters.
- This [video](https://www.youtube.com/watch?v=jUHc4G5CNr4) shows a 360 drone flight above the whole area:
